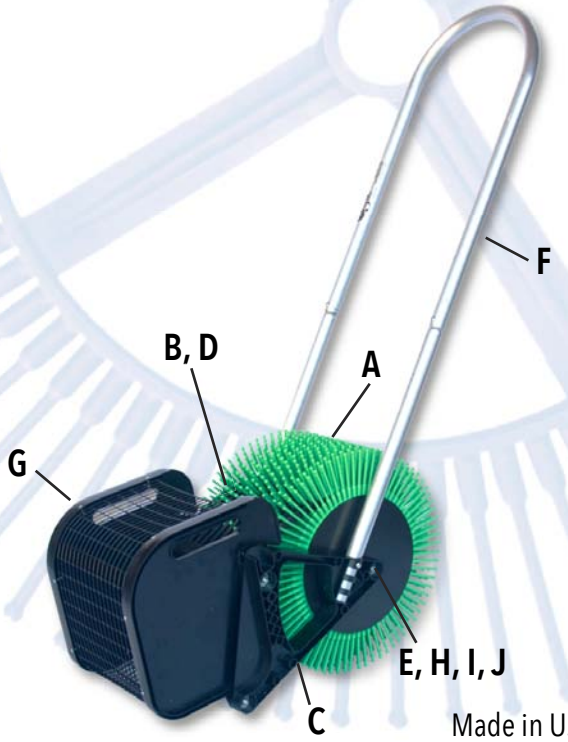
Mini Paintball Collector

IMPORTANT
Read before use

- **Maintain Clean Grounds:** The cleaner your ground is, the better the unit will operate. If you can, **mow it and blow it prior to cleanup**..
- **Move Forward Only:** Try to go forward only, at all times. If you go more than a half rotation backwards, ejector fingers [B] can become disengaged. If they do become disengaged, push them back down in between the collector wheels [A].
- **To Empty Your Basket:** Lift basket [G] with slits on the side. Dump basket of contents into any desired location. When empty, replace basket between grooves on machine.
- **Loose Wheels (Balls aren't being caught in wheels):** If you have loose wheels [A], use a 7/16" deep well socket wrench to tighten wheel drum located on the sides of the machine [J].
- **Loose Fingers:** If you have loose fingers, apply spacers to the finger shaft [D].
- **Other Tips and Troubleshooting:** We offer many videos on YouTube that can assist in assembling and operating your Ammo-Up. Visit *www.youtube.com/ammoupusa* to view these helpful videos.
- **Service and Parts:** If you have any parts or service issues, we are always happy to help, please call us at 904-641-3934 or 800-940-2688 or email *info@AmmoUpUSA.com*.



Made in U.S.A.
